# COC19 TM Assessors Certificate

## Guide & Examination

#### Mission: Assessing the Certificate of Compliance

#### Rite of Passage

The Bearer of the COC19 is qualified to assess a site for the Certificate of Compliance. The bearer will consider technology, equipment and layered manpower by skillsets. Furthermore, the bearer is aware of crime related to the threat.

#### The Assessor Studies

#### 5 Booklets

Security and Operational Protocol guide for managing covid 19
Covid Building Security Protocols
Housing Management
Vaccine Security
Al for Security, Criminology-Risk Investigation

That talk to:

#### **Technology**

The Technology and equipment complies with "certain standards"

The use of the technology and installation of such meets the standards

#### Manpower

Layered manpower by skillsets for reducing violent incidents

Equipped and relatively skilled for Physical intervention

Educated to use relative protocols for specific sites

The security sector define covid-19 quite differently to the health community.

The protocols take into consideration technology, equipment and skills required to limit the levels of collateral damage

#### Assessor must know

#### **Equipment Criteria**

- Where to check protocols relating credible and legitimate CCTV Thermal imaging or non-contact thermometers (FDA)
- Knows where to find the latest technology. <u>IPVM</u> could be used to verify the brand performance or if the brand has been banned or has controversial issues.
- Knows, that the equipment must be correctly used and installed (FDA)
- Also knows the importance of keeping the audience calm. That there should be no alarm that triggers 'sound alerts' in public areas if a person's temperature is of concern so as not to stimulate panic.

#### Manpower

The Assessor should be knowledgeable with specifics and layered by skillsets

- Knows that the security staff in different fields of interest are using the appropriate security covid-19 protocols for example, a mall or office building has different protocols for hotels, quarantine centers, nursing homes, rehabilitation
  - centers, boarding schools, or old aged homes. The assessor must question which other staff besides the security must know the protocols.
- Knows that security staff that are taking temperature is managed by a manager or supervisor that has conflict management, leadership, or any other form of skills and character traits to calm people down.
- Knows that security staff that may need to use physical intervention must wear facial shields or goggles because the eyes are just as porous as the mouth. People that are upset tend to spit when they shout, or just spit out of contempt.

#### Examination

The assessor knows that the staff could handle life impacting and deadly outcomes. These are serious considerations.

- 1. What is the key principle to security success for managing an active biological threat?
- 2. Why is it important to use credible and appropriate technology?
- 3. Why must the frontline staff wear medical masks and specific staff more so by wearing facial shields or goggles?
- 4. What is the most important objective regarding managing the visitors on the ground and why?
- 5. What are the characteristics of a frontline officer and what skills should they have?
- 6. Why do different sites require different protocols?
- 7. Besides the security staff who else would need to use the protocols at a site?
- 8. What type of crime is related to the threat?
- 9. How would one identify a high risk site?
- 10. What information would you like to volunteer?

This is a powerful career that is cognitively driven

The practitioners must out-think and outsmart the perpetrators before an incident occurs.

They cannot afford to be misled

The Assessor knows Compliance Procedures

<u>View the Assessor Procedure</u> (The rates could vary between countries)

### Security Success

depends on

The level of situational awareness

- of the people (decision-makers) on the ground
- and their reaction speed
